

TULASI KANIKARAM

QA Automation Engineer

Email: kanikaram.tulasi1920@gmail.com

Ph.no: 868-862-1538

Professional Summary:

I'm a QA professional with around 4+ years of experience in manual and automation testing within the banking domain. Skilled in using Selenium WebDriver, Playwright, TestNG, Maven, Java, and Rest Assured, I specialize in building and maintaining automation frameworks for web and API testing to enhance testing efficiency and product quality. Experienced across the software testing lifecycle, including requirement analysis, test case design, execution, defect tracking, and reporting. I'm well-versed in Agile methodologies, collaborating with cross-functional teams to plan, track, and deliver releases while ensuring high standards of software quality and performance.

Technical Skills:

Automation Tools & Frameworks:	Selenium WebDriver (Java & Python), Playwright, TestNG, Cucumber, Pytest, Maven, Rest Assured, Data-Driven Framework, Page Object Model (POM)
Programming & Scripting Languages:	Java, Python, SQL, JCL, COBOL
API & Web Services Testing:	Postman, Rest Assured API, Web Services (SOAP & REST), JSON, XML
Version Control & CI/CD Tools:	GIT, Maven, Jenkins
Defect Tracking & Project Management:	JIRA, Agile Methodologies
Databases & Mainframes:	SQL Server, MySQL, Mainframes, DB2
Test Management & Reporting Tools:	TestNG Reports, Extent Reports

PROFESSIONAL EXPERIENCE:

Project : ACE Life Insurance - QA Automation – Accenture, Hyderabad

Dec- 2024 - till now

Project Description: ACE LIC was a project undertaken by Genpact, A leading integrated financial services provider in India. Genpact served over 16 million. Individual investors and provided investor services to more than 300 corporates. The company offered a wide range of financial services, including stock broking, depository participants, distribution of financial products, insurance broking, commodities broking, and personal finance advisory services.

Key Result Areas:

- Actively participated in Agile development processes including daily stand-ups, sprint planning, sprint refinement and retrospectives.
- Managed QA processes including project charter, test strategy, test plan, test data preparation, and test automation reviews.
- Monitored test progress through each release cycle, providing comprehensive test results and status reports to stakeholders.
- Analyzed client/business requirements and delivered customized testing solutions aligned with functional and technical specifications.
- Designed and executed test cases within Azure Test Plans, performed reviews, and maintained seamless execution and tracking.
- Performed API testing using Postman and Rest Assured, validated response codes, and developed automation tests for endpoints.
- Enhanced team productivity by optimizing testing tools and processes, improving quality and reducing release cycle times.
- Designed and executed detailed test plans and gap analyses to ensure full coverage of business and functional requirements.
- Automated test cases using Selenium WebDriver, TestNG, and the Page Object Model (POM) framework; integrated scripts into an Auto Regression Suite following peer review.
- Conducted risk-based testing to prioritize critical functionalities and improve defect detection efficiency.
- Performed cross-browser testing on Chrome, Firefox, Edge, and Internet Explorer to ensure UI consistency.
- Executed multiple testing types including Smoke, Functional, Integration, System, Regression, UAT, Positive/Negative, and GUI testing.
- Verified change requests and defects, tracked issues using JIRA, and maintained Error and Suggestion Logs.

- Generated **unit test and review reports**; ensured clear communication of test results and defect details to developers.
- Executed **Selenium automation scripts** in Eclipse IDE, achieving coverage and faster validation cycles.
- Developed and maintained **COBOL programs** for batch processing and core business logic, and authored **JCL scripts** to schedule and monitor jobs, ensuring efficient mainframe operations and timely data processing.
- Managed **CI/CD** workflows using **Visual Studio and Azure DevOps** to streamline deployments.
- Used **Git** and **GitHub** for version control, code reviews, and team collaboration.

Environment: Agile, Java, Selenium WebDriver, Playwright, TestNG, Cucumber, Maven, Rest Assured, Postman, POM Framework, Data-Driven Framework, Jenkins, Git, GitHub, JIRA, Azure DevOps, Azure Test Plans, Eclipse IDE, IntelliJ, API Testing (RESTful & SOAP), JSON, XML, SQL Server, Python, HTML5, CSS3, JavaScript.

QA System Engineer, Infosys, Hyderabad (India)

November-2021

Project: C V S C A R E M A R K (Healthcare Solutions)

Description: The project involved developing a website for healthcare professionals and consumers to search for doctors in specific specialties and locations and book appointments. Additionally, users could make online payments for the fees after their treatment.

Key Result Areas:

- Analysing requirements and preparing test scenarios and testcases.
- Validating all client payments to ensure execution and reconciliation accuracy.
- Developing software using Selenium, Java, Rest API (Postman), and BDD Cucumber.
- Designing testcases in JIRA, reviewing them, and executing them in the same platform.
- Conducting functional, integration, system, and regression testing.
- Defining entrance and exit criteria for the User Acceptance Testing (UAT) phase.
- Reviewing, managing, and logging defects identified during UAT in JIRA.
- Performing white-box testing using Testing for classes and methods.
- Automating UI functional testing using Selenium WebDriver and enhancing automated test framework using Cypress and Page Object Model concepts.
- Participating actively in all phases of the Software Development Life Cycle (SDLC).
- Retesting and closing bugs upon resolution.
- Conducting Smoke, Functional, Integration, System, User Acceptance, Regression, Positive, Negative, and GUI testing.
- Coordinating with the development team to resolve defects.
- Conducting Browser Compatibility testing on various browsers (Google Chrome, Firefox, Microsoft Edge, Internet Explorer).
- Preparing the Traceability Matrix document.
- Identifying test cases unsuitable for automation and transferring them to the Manual Regression Suite.
- Executing Selenium Automation scripts using Eclipse IDE.

Environment: Functional testing, Agile, Java, Selenium WebDriver, jira.

Education: B. Tech in Electronics & Communication Engineering -VVIT, Guntur, May – 2021

Key Achievements:

- Received client appreciation for delivering the product ahead of schedule, contributing to budget savings.
- Developed and implemented automated test suites, significantly improving test coverage, product quality, and reducing post-release defects.
