SUMMARY

Senior Test Analyst presently working with **Coforge Ltd.** having overall **10** years of experience in software quality assurance processes in **ETL Testing, Data warehouse testing, API Testing, Database Testing, Desktop Application Testing (Clinical Trail), Web Application, Agile Methodologies** and exposed to the entire software testing life cycle.

PROFESSIONAL SNAPSHOT

- Experience in **ETL Testing, Data warehouse testing, Database Testing** using **sql** server.
- Experience in **informetica Power Center** to load the data in database.
- Having good knowledge in **python**.
- Extensive experience on bug tracking tools like **Jira, TFS**.
- Extensive experience in Test case management tool **TestRail, Polarian, Confluence, RTM**.
- Extensive in **API Testing** using **Postman Tool, Swagger**.
- Experience in **Test Complete** for automation Script execution only for Desktop Application.
- Working experience of Testing on **ETL Testing, Data warehouse testing, Informetica, API Testing, Data warehouse Testing, POS Testing, Web Based Applications, Desktop Application, E-learning, SharePoint Application, and Logistics Domain, Finance Domain, Payment Merchants, Investment domain**.
- Completed certification of training in Infor (INDIA) Pvt. Ltd. Hydrabad for WMS functional.

PROFFESIONAL EXPERIANCE

- Presently working with **Coforge Ltd**, Noida from 13th Sep 2021.
- Worked as Test Analyst with **Trangile Services Pvt. Ltd**, Noida from 11th Dec 2018 to 9 Sep 2021.
- Worked as Test Analyst in **DB Schenker India Pvt. Ltd., Gurgaon** from 7th Sep 2017 to 7 Dec 2018 on the payroll on **Vlink India Pvt. Ltd.**
- Worked as QA Engineer in **QA InfoTech Noida** from 1st May 2015 to Sep 2017.

TECHNICAL SKILLS

- **Bug Management Tool:** Jira, TFS, Polarian, Zephyr.
- **Test Management Tool:** Zephyr, Testrail.
- **Security Testing Tool:** OWASP.
- **Concepts:** Smoke Testing, Regression Testing, Functional Testing, Bug life cycle, STLC and SDLC, **Agile Methodologies**.

EDUCATIONAL QUALIFICATION

- B.TECH from *IIMT College of Engineering Gr. NOIDA* affiliated to U.P.T.U, (U.P).
- Intermediate from U.P Board.
- High School from U.P Board.

PROJECTS UNDERTAKEN

DWH (Data Warehouse Testing)

Description:

A Data Warehouse (DWH) Testing project involves the systematic process of verifying and validating the data stored in a data warehouse to ensure its accuracy, consistency, and reliability. This is crucial for businesses and organizations that rely on data-driven decision-making, as errors in the data can lead to incorrect analyses and decisions.

IMS Enterprise Data Warehouse (EDW) has been built to consolidate data across various accounting platforms and data management applications to be the singular data model for each business line to further integrate with the reference data model expanded to support overrides and additional client specific attributes for consistent reporting across various reporting applications on SEI Tech platform such as MDB, IDB, IMS Platform, Analytics, Scope, Client Custom as well API that integrate externally on client platforms.

Created a centralized data warehouse that consolidates data from multiple fund and portfolio accounting systems as well as reference data systems to provide consistent, accurate, and unified reporting across various applications, while also supporting client-specific data feeds and additional attributes and/or overrides.

The vision is to Establish a single source of truth for all accounting sources as well as reference data to streamline reporting, improve decision-making, and support client-specific customization.

Client: Champlain, Geneva, HSBC, PIMCO, Brandes etc.
Team Size: 24
Role: Sr. Test Analyst
Test Case Management Tool: Testrail.
Bug Reporting Tools: Jira.
Document Case Management Tool: Confluence

Responsibilities:

- Develop and refine the overall DWH test strategy, considering the scope, objectives, and constraints of the project.
- Collaborate with stakeholders to create a comprehensive test plan that defines the testing approach, timelines, and resource requirements.
- Design and develop complex test cases, test scripts, and test scenarios to comprehensively cover various aspects of DWH testing, including data extraction, transformation, loading, and data validation.
- Ensure that test cases are well-documented, clear, and cover various testing scenarios, including edge cases.
- Lead the execution of test cases and actively participate in test case execution when needed.
- Monitor and report on test progress, identify issues, and work with the team to resolve defects or data anomalies.
- Evaluate data quality metrics and design tests to assess data quality within the data warehouse.
- Collaborate with data analysts to define data quality standards and benchmarks.
- Develop and maintain automated test scripts to streamline regression testing and increase test coverage.
- Implement best practices for test automation and optimize testing processes.
- Lead the defect identification and resolution process, including defect tracking, prioritization, and verification of fixes.
- Collaborate with developers and data engineers to ensure timely defect resolution.
- Plan and execute performance tests to assess the data warehouse's responsiveness, scalability, and efficiency.
- Analyze performance test results and recommend optimizations when necessary.
- Ensure the availability and consistency of test data, both for functional and non-functional testing.
- Coordinate with data administrators and data engineers to refresh test data and maintain data privacy.

DAAS(Data as a service)

Description:

Develop Standardized Data APIs to deliver DWH data. Vision is to be able to expose the data APIs.

Client:	CIBC, Champlain, Geneva, HSBC, PIMCO, Brandes, etc.
Team Size:	3
Role:	Sr. Test Analyst
Test Case Management Tool:	Zephyr.
Bug Reporting Tools:	Jira.

Responsibilities:

- Daily monitoring of all the State automation activities by detailed analysis of server logs, daily reports as per defined check list.
- Creation of Test Documentation (Intermediate level)
- Daily monitoring of all the job data feeds (import and export) from customers, partners and affiliate states by detailed analysis of server logs, daily reports as per defined check list.
- Daily reporting of completion of all monitoring activities, and list of specific customer and partner feeds that didn't complete successfully or had issues.
- Enter tickets for the bugs found in the engineering ticketing system with detailed description of issues.
- Verify bugs when bugs are fixed and regression testing before the release.
- Liaise with the client interface for any customer related issues at the setup and ongoing stage.

Pine Labs POS (Point of sale)

Description:

This is the pine labs product for use in supermarkets by merchants for billing and inventory management. POS is available for all type of devices mobile application, web application, POC machine. Now we are developing a loan facility for merchants in finance department up to 5 lacs for 90 days EDI (Easy Day Installment).

Client:	Pine Labs
Team Size:	6
Role:	Sr. Test Analyst
Test Case Management Tool:	Excel.
Bug Reporting Tools:	Jira.

Responsibilities:

- Daily monitoring of all the State automation activities by detailed analysis of server logs, daily reports as per defined check list.
- Creation of Test Documentation (Intermediate level)
- Daily monitoring of all the job data feeds (import and export) from customers, partners and affiliate states by detailed analysis of server logs, daily reports as per defined check list.
- Daily reporting of completion of all monitoring activities, and list of specific customer and partner feeds that didn't complete successfully or had issues.
- Enter tickets for the bugs found in the engineering ticketing system with detailed description of issues.
- Verify bugs when bugs are fixed and regression testing before the release.
- Liaise with the client interface for any customer related issues at the setup and ongoing stage.

Master Scope(MSCCT)

Description:

This is a Stand Alone (Desktop) application that is used in the clinical trial process for preparing the new drug for new daisies like Covid-19. That is use for doctors in clinical trial process for human trail phase.

Client:	Novartis, Sanofi, Vertex, AstraZeneca etc.
Team Size:	25
Role:	Test Analyst
Operating System:	Images are provided by Client for different drugs.

Test Case Management Tool: Polarian.
Bug Reporting Tools: TFS, Polarian.

Responsibilities:

- Reviewing manuals and specifications (Novice level): Review all relevant documents for a project regarding testability, comprehensibility, plausibility, inconsistencies, and requirement gaps and provide feedback of review results to V&V internal staff and external teams.
- Design Test Cases (Intermediate level): This includes the definition of test case goals and writing of test steps using common testing methods and techniques. Expected results have to be defined as well as test prerequisites. A traceability regarding requirements, test cases and test documents has to be established.
- Test Execution (Intermediate level): Execute predefined test cases on ERT Software using suitable test data and create meaningful screenshots in the process.
- Analysis of Test Results (Intermediate level): Check and compare expected with actual result, also applying common sense and knowledge of state-of-the-art implementation to identify deviations. Rate test results and report identified deviations.
- Perform Test Reviews (Intermediate level): Check execution and documentation of test case completeness/correctness. Check test plans for conformity and completeness regarding applicable/covered requirement
- Bug Handling (Intermediate level): Entering of bug reports in ERT bug tracking systems that are detailed and reproducible. Provide severity ratings and priorities and keep track of the bug lifecycle
- Maintaining and Setup of Test Environment (Intermediate level): Setup and update configured test systems for test execution. This includes knowledge and use of applicable backend environments and dummy tools for testing purposes.
- Creation of Test Documentation (Intermediate level):
- Knowledge of all documents described in applicable SOPs and capability to create documents according to various test activities.
- Reporting of Project Status (Intermediate level): Report current status of assigned tasks to next reporting level or external parties (TPJM, PJM). Attend status meetings and report current status for projects/topics as needed.

PERSONAL SNAPSHOT

Name: Tarun Tyagi
Date of Birth: 17th July 1992
Father's Name: Sushil Tyagi
Nationality: Indian
Marital Status: Single
Language Known: Hindi, English
Present Address: Noida

I hereby inform that all information written above is true to the best of my knowledge and belief.

(Tarun Tyagi)
